

Plant	Good For	Description
<b>Manuka</b> <i>Leptospermum scoparium</i>	 	Shrub - small tree, great for planting along streams, rivers and in wetlands, also big gully plantings. Provides good shelter, food for bees. Establishes relatively quickly.
<b>Kanuka</b> <i>Kunzea ericoides</i>	 	Medium sized tree, great for planting on drier sites along streams, rivers and on dry hillsides. Provides good shelter, food for bees. Establishes relatively quickly.
<b>Mahoe   Whiteywood</b> <i>Melicytus ramiflorus</i>	 	Small tree, great for planting along stream & river banks and gully plantings. Provides good shelter, good early succession species. Establishes relatively quickly.
<b>Ti Kouka   Cabbage Tree</b> <i>Cordyline australis</i>	  	Palm-like medium sized tree suitable for planting along stream and river banks and in and around wetlands. Establishes relatively quickly.
<b>Tarata   Lemonwood</b> <i>Pittosporum eugenoides</i>	 	Small to medium tree common in landscaping and hedges. Good for planting along stream and river banks, hillside/gully plantings. Establishes relatively quickly.
<b>Kohuhu</b> <i>Pittosporum tenuifolium</i>	 	Small to medium tree common in landscaping and hedges. Good for planting along stream and river banks, hillside/gully plantings. Establishes relatively quickly.
<b>Akeake</b> <i>Dodonaea viscosa</i>	 	Shrub or small tree, great for planting along river and stream banks, hillsides and gullies. Can tolerate drier sites. Establishes well and relatively quickly.
<b>Makomako   Wineberry</b> <i>Aristotelia serrata</i>	 	Small tree with wide branching habit with good berries for native birds. Grows well in gullies, along stream and river banks and around the edges of wetlands.
<b>Karamu</b> <i>Coprosma robusta</i>	 	Fast growing small tree. Grows well in wetlands, gullies, along stream and river banks. Good berries for native birds.
<b>Manatu   Ribbonwood</b> <i>Plagianthus regius</i>	  	Tall tree with very good root systems. Good for erosion prone river and stream banks and steep hillside plantings. May need some snail/slug control when young.
<b>Haupara</b> <i>Pseudopanax lesonii</i>	 	Small bushy tree, growing to about 5m. Plentiful berries for native birds, suitable for coastal habitat, riparian areas and lowland forest habitats.
<b>Mapou   Red Mapou</b> <i>Myrsine australis</i>	 	Tall bushy shrub, good for planting on hillsides, along stream and river banks, can tolerate drier sites, provides good shelter.
<b>Kowhai</b> <i>Sophora teptera / microphylla</i>	 	Large/small leaved Kowhai, small tree. Does well planted along river and stream banks. Can tolerate full sun and windy sites. Good food for native birds and bees.
<b>Kahikatea</b> <i>Dacrycarpus dacrydioides</i>	 	Stout, tall conifer type tree. Grows well in wetlands, gullies, along river and stream banks. Can tolerate wet sites, tolerates full sun. Good berries for native birds.
<b>Houhere   Lacebark</b> <i>Hoheria populnea</i>	 	Soft-wooded medium sized tree. Good for planting along stream and river banks and in gullies. Susceptible to slug/snail damage when young.
<b>Harakeke   Swamp flax</b> <i>Phormium tenax</i>	 	Large leafy shrub-sized plant growing from a central crown with a big seed head. Grows well in wetlands, gullies, damp areas along stream and river banks. Good food source for birds/bees.
<b>Wharariki   Mountain flax</b> <i>Phormium cookianum</i>	 	Large leafy shrub-sized plant growing from a central crown with a big seed head. Grows well on hillsides, along stream and river banks. Good food source for birds and bees.
<b>Rautahi   Cutty grass</b> <i>Carex geminata</i>	  	Bushy grass like sedge, growing from rhizomes that can creep along underground spreading itself along a stream bank or amongst a wetland. Can tolerate some low salt environments.
<b>Pukio   Swamp sedge</b> <i>Carex virgata</i>	 	Bushy grass like sedge, growing from a crown. Grows well along river and stream banks or in wetlands.
<b>Purei</b> <i>Carex secta</i>	 	Bushy grass like sedge, growing from a crown. Grows well along river and stream banks or in wetlands.
<b>Giant umbrella sedge</b> <i>Cyperus ustulatis</i>	  	Bushy grass like sedge, growing from a crown. Grows well along river and stream banks or in wetlands.
<b>Toetoe</b> <i>Austroderia fulvida</i>	  	Larger and taller grass like plant, growing from a crown. Grows well along river and stream banks or in wetlands.
<b>Koromiko   Hebe</b> <i>Veronica (Hebe) stricta</i>	 	Shrub with narrow leaves, white / mauve flowers. Good for steep banks, good food for bees.
<b>Oioi   Jointed rush</b> <i>Apodasmia similis</i>	  	Rush-like growth habit, spreading by rhizomes in a crown-like manner. Often found in coastal margins, coastal wetlands, but occasionally within inland wetlands.
<b>Salt marsh ribbonwood</b> <i>Plagianthus divaricatus</i>	  	Bushy tangled shrub. Often found in coastal margins, coastal wetlands, but occasionally within inland wetlands.
<b>Coastal Tree Daisy</b> <i>Oleria solandri</i>		Bushy shrub with square yellow sticky twigs bearing clusters of dark green leaves, inhabiting coastal areas.
<b>Karo</b> <i>Pittosporum crassifolium</i>	  	Bushy medium sized tree, often found in coastal conditions or near coastal locations. Good for native birds and bees.

Plant	Good for	Description
<b>Ngaio</b> <i>Myoporum laetum</i>		Small tree, bright green leaves, can tolerate coastal wetland conditions
<b>Pohutukawa</b> <i>Metrosideros excelsa</i>		Large sprawling tree that grows near the coast, can tolerate coastal conditions, bright red flowers around Christmas.
<b>Kapuka, Papauma   Broadleaf</b> <i>Griselinia littoralis</i>		Medium sized bushy tree. Provides good shelter as a hedge and habitat for small native birds.
<b>Taupata   Mirror plant</b> <i>Coprosma repens</i>		Bushy shrub/small tree, provides good shelter. Can tolerate coastal conditions. Good for bees and native birds.
<b>Rewarewa</b> <i>Knightia excelsa</i>		Tall narrow shaped tree common in forest edges, can tolerate exposed areas. Good for bees and native birds.
<b>Totara</b> <i>Podocarpus totara</i>		Tall bushy iconic common native tree. Typical forest species. Good for native birds.
<b>Kauri</b> <i>Agathis australis</i>		Tall iconic native tree. Typically a forest species, can tolerate drier hillside sites. Grows quickly in good soils in sunny sites.
<b>Titoki</b> <i>Alectryon excelsus</i>		Medium tree, forest species typically, but can tolerate some open sites in gullies etc. Good for native birds.
<b>Rimu</b> <i>Dacrydium cupressinum</i>		Conifer like tall native tree. Has small berries, good for native birds. Forest species, grows well in most situations but typically better in partial shade and sheltered site while young.
<b>Miro</b> <i>Pectinopitys ferruginea</i>	<i>some sites</i>	Tall native tree. Has small berries, good for native birds. Forest species, grows well in most situations but typically better in partial shade and sheltered site while young.
<b>Pukatea</b> <i>Lourelia novae-zelandiae</i>	<i>some sites</i>	Tall tree with large buttress lower trunk. Grows well in damp forested areas and can tolerate wetland conditions.
<b>Tanekaha   Celery Pine</b> <i>Phyllocladus trichomanoides</i>	<i>some sites</i>	Tall native tree, can tolerate semi-dry ridges and forest restoration sites.
<b>Puriri</b> <i>Vitex lucens</i>		Big tree with extensive branching canopy with good flowers for bees and native birds and big berries for native birds.
<b>Putawetaweta   Marble leaf</b> <i>Carpodetus serratus</i>		Medium sized tree with tangled branches when young. Good in a lot of situations, hardy tree.
<b>Tawa</b> <i>Beilschmiedia tawa</i>		Tall canopy tree. Good berries for birds and the flowers are good for bees.
<b>Matai</b> <i>Prumnopitys taxifolia</i>		Tall conifer canopy tree good for forest restoration. Needs a bit of shade and shelter when young. Berries good for native birds.
<b>Kohekohe</b> <i>Didymocheton spectabilis</i>		Canopy tree, good for forest restoration. Can tolerate moderately open areas.
<b>Kawakawa</b> <i>Piper excelsum</i>		Bushy shrub, with glossy green leaves - often with numerous holes in them. An important understorey species in lowland forest.
<b>Porokaiwhiri   Pigeonwood</b> <i>Pterophylla racemosa</i>		A common forest tree of coastal and lowland forest. Dark green glossy leaves. Large orange oval shaped fruit.
<b>Horoeka   Lancewood</b> <i>Pseudopanax crassifolius</i>		Small tree with distinctive draped thick long narrow toothed juvenile leaves - changes to more bushy form when mature. Stem can be made into walking-stick.
<b>Karaka</b> <i>Corynocarpus laevigatus</i>		Large tree, often in coastal lowland forest, dark green leaves and large (4cm) orange fruit.
<b>Pate</b> <i>Schefflera digitata</i>		Small bushy tree with (usually) 7 thin finely-toothed leaflets in a fan on a long stalk. Flowers in a diffuse cream spray
<b>Nikau   Nikau Palm</b> <i>Rhopalostylis sapida</i>		Graceful palm to 15m tall with a ringed trunk and 3m long erect leaves inhabiting lowland forest
<b>Wharangi</b> <i>Melicope ternata</i>		Bushy small tree, found in coastal to lowland forest, often favouring margin habitat.
<b>Taraire</b> <i>Beilschmiedia taraire</i>		Common canopy forming tree in lowland and lower montane forests, mainly north of Auckland, Thames.
<b>Larged leaf 5-Finger</b> <i>Pseudopanax laetus</i>		Bushy shrub with large hand-shaped leaves on red stalks, grows to about 5m, found throughout inland forests.

Key: Good for... stream & river banks wetlands & damp gullies hillsides, gullies and drier sites forest restoration coastal margins and coastal wetlands
